

This dashboard provides an overview of overall employees, attrition, attrition rate, and active employees. It also highlights average age, department-wise attrition, and education field attrition.

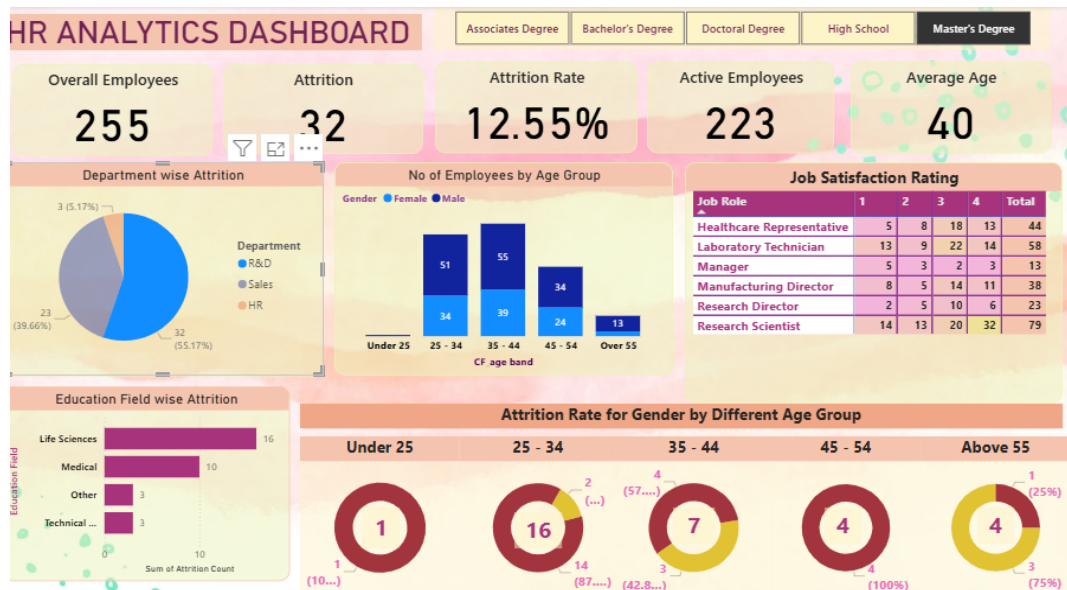

This dashboard emphasizes attrition segmented by gender and age group, job satisfaction ratings across roles, and deeper department attrition trends.

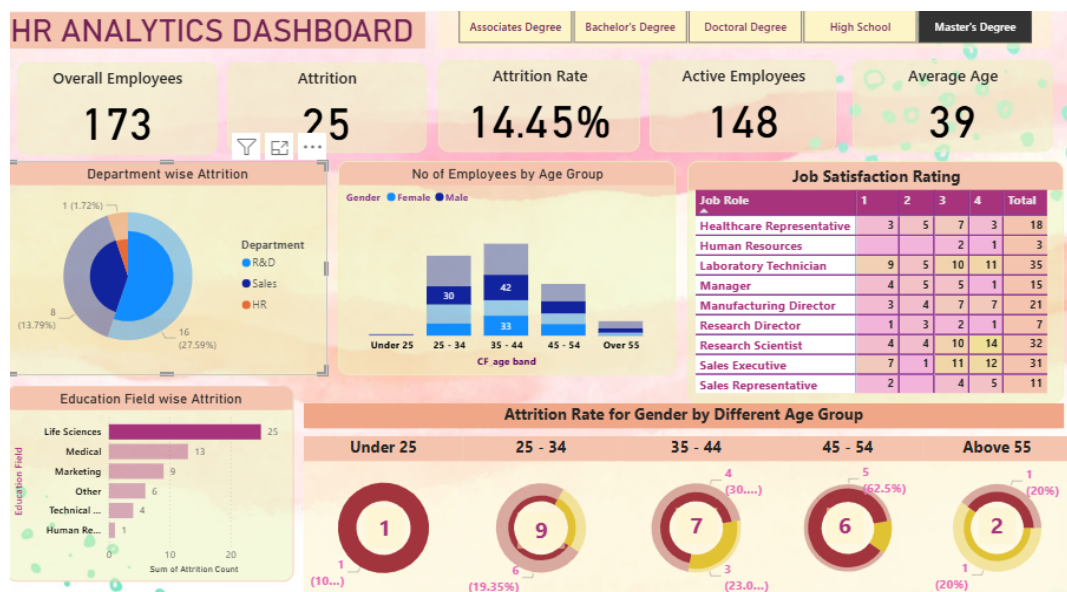

Here, the focus is on education background analysis, with attrition patterns across fields like Life Sciences, Medical, and Technical. It also shows attrition rates by age group and gender.

This dashboard continues the education-based segmentation, showcasing which qualifications experience higher turnover and how satisfaction levels impact attrition.

The dashboard highlights departmental distribution and job satisfaction scores. Insights show which departments face higher attrition and the age groups more vulnerable.

This final dashboard emphasizes job roles and satisfaction distribution, providing clear indicators of where HR can focus to reduce attrition and improve engagement.
